Duette® shades: smart design, sustainable living

Comfort, naturally

Duette® shades do more than cover windows—they elevate everyday living. Their signature honeycomb design creates a thermal barrier that helps keep your home warmer in winter and cooler in summer, reducing energy use with quiet efficiency.

That same design also softens sound. By absorbing echoes from hard surfaces, Duette® shades reduce noise by up to 60%, creating a calmer, more restful space.

Made to last

Crafted from durable, UV-resistant materials, Duette® shades are built for lasting performance and timeless appeal. Precision-made, they hold their shape, colour, and function—season after season.

With Duette® shades, you're choosing comfort, sustainability, and a home that feels as good as it looks.

Let's talk

Brainstorm with our design expert.

Fabrics with a future

Sustainability is redefining interior design—and Duette® shades are at the forefront. With our innovative Architella® and re-life fabric ranges, we prove that thoughtful design can be both stylish and responsible.

RE-LIFE: *renewed with purpose*

Crafted entirely from recycled polyester, including repurposed PET bottles, re-life fabrics give new life to waste—delivering durable, high-quality shades with a softer environmental footprint.

Architella®: *innovation at the core*

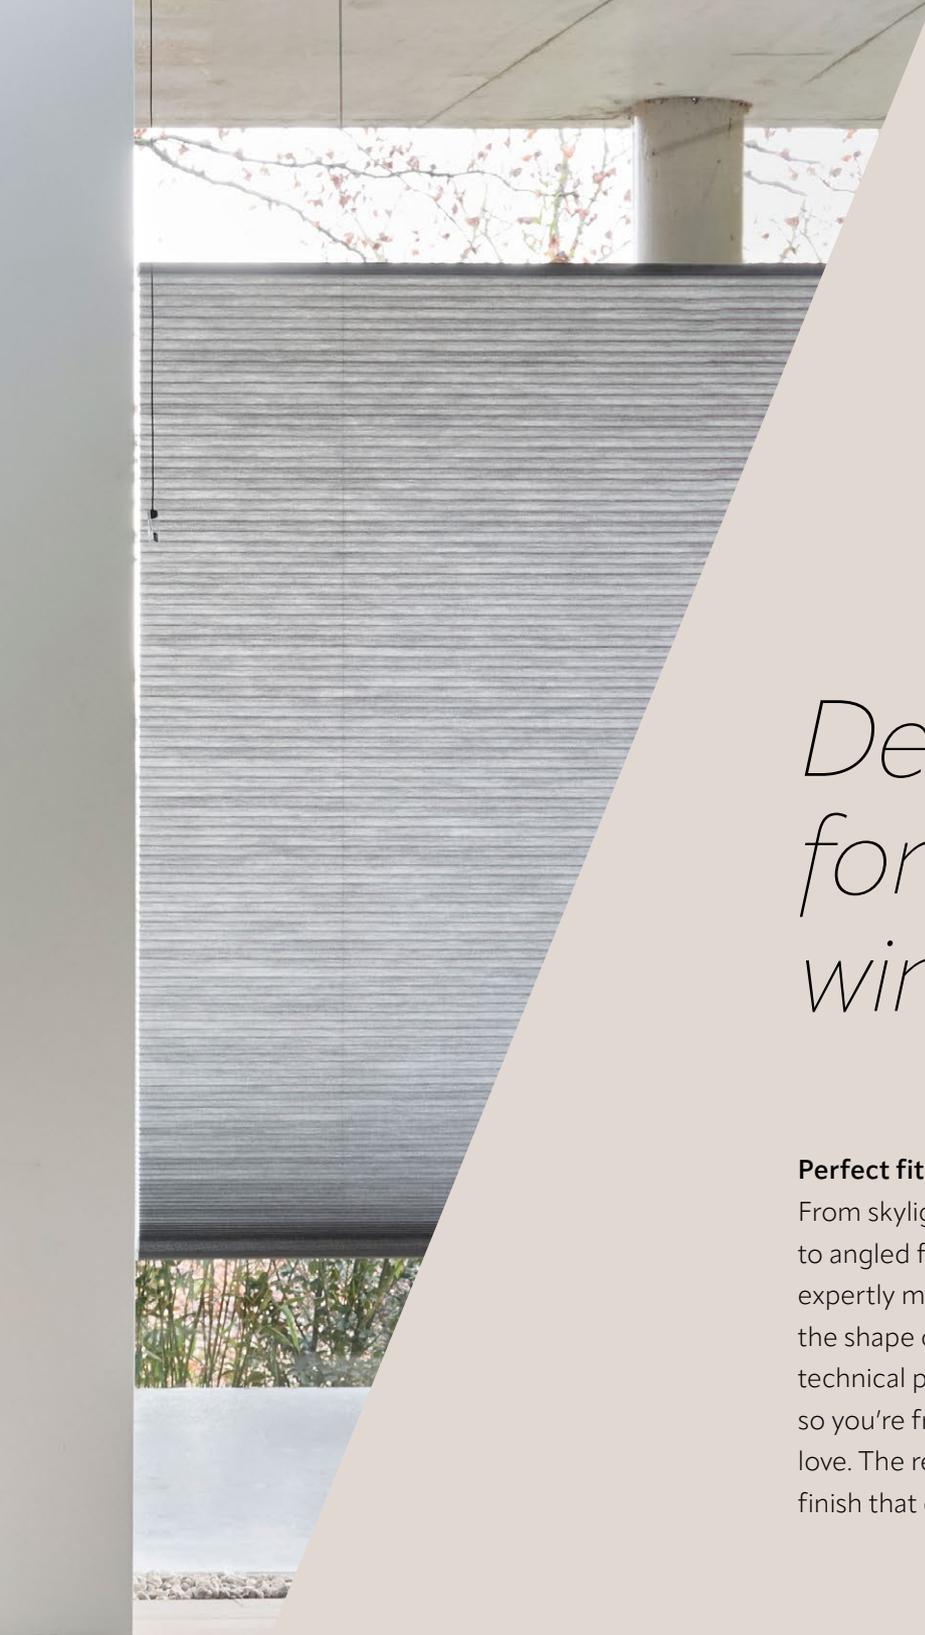

Featuring a unique honeycomb-within-a-honeycomb design, Architella® offers triple-layer insulation for exceptional energy savings and sound absorption—all year round.

Designed for every window

Perfect fit, every time

From skylights to arched windows, bays to angled frames—Duette® shades are expertly made to measure, no matter the shape or size. We handle the technical precision behind the scenes, so you're free to focus on the look you love. The result? A seamless, tailored finish that elevates every space.

Smart control, made simple

PowerView® automation brings effortless living to your fingertips. Set your Duette® shades to move on your schedule—whether through the app, a remote, or voice command. It's the easy way to enjoy the ideal light, privacy, and comfort—automatically, every day.

PowerView® integrates seamlessly with your smart home system, creating a personalised experience that adapts to the rhythm of your life.

Designed with care

Style and safety go hand in hand with our cordless LiteRise® and retractable SmartCord® systems. Designed to eliminate clutter and enhance ease of use, they offer peace of mind without compromising on design.

Tailored light, your way

Duette® shades offer precise control with fabrics for every space—room-darkening for bedrooms, moisture-resistant for bathrooms, and soft sheers for living areas. For total darkness, pair room-darkening fabrics with LightLock™, which blocks nearly all incoming light.

The day & night system combines two fabrics in a single shade, offering seamless control from morning to evening.

No-drill solutions, seamless style

Fitting Duette® shades is simple—with smart, no-drill options designed for modern windows and doors.

FrameFix™

A discreet frame attaches directly to UPVC, aluminium, or tilt & turn windows—no drilling needed. Easy to remove for cleaning and available in top-down/bottom-up styles for flexible light and privacy.

TruFit®

TruFit® mounts directly onto glass, making it perfect for tilt & turn windows, doors, and standard frames. Enjoy smooth, no-drill installation with versatile light control.
